Use AI safely, and prove it works

Check the output, protect your data, measure the time it gives back.

PART 4 OF 4

Spot a wrong answer

7 Check before it leaves

Very confident, no source
Ask: “Where does this come from?”

Figures that don’t add up
Recheck totals yourself

Names or dates you never gave it
It may have invented them

Quotes you can’t find
Never publish an unchecked quote

Long but vague
Ask for specifics, or a shorter answer

What AI is still weak at

- ✕ **Very recent events:** unless it searches the web
- ✕ **Exact maths on big data sets:** use a spreadsheet
- ✕ **Legal or tax certainty:** ask a professional
- ✕ **Anything it cannot see:** attach the file
- ✕ **Your unwritten know-how:** write it in your brief
- ✕ **Knowing when it is wrong:** a person checks

A six-rule AI policy

6 Never paste in

Accounts	Use business accounts for work, never personal ones
Data	No customer, staff or confidential data unless approved
Checking	A person reviews everything before it goes out
Honesty	Tell clients if they ask whether AI helped
Reporting	Flag anything that looks wrong or unsafe
Ownership	One person owns the tools, settings and access

Check your privacy notice covers AI tools. A starting point, not legal advice.

Track the time it saves

JOB	BEFORE	WITH AI
Monday report		
Quote follow-ups		
Meeting notes		
Customer replies		
Job adverts		
Total per week		

Minutes per week. Check again after a month.

Your 30-day plan

9 Start this week

Week 1
One repeated job, done with AI

→ **Week 2**
Save the prompts that worked

→ **Week 3**
Set up a Project with your brief

→ **Week 4**
Measure, share, pick the next job

Small and repeated beats big and once.

Advanced moves

10 Power moves

Second opinion
Ask another tool, compare

Mark against a list
“Check this against our rules”

Spot the changes
“What changed between these?”

Play the customer
“Reply as a sceptical buyer”

When a prompt is not enough

Data in three systems · The same task every day · Mistakes that cost money

That needs a solution built around your business. Tell us what is holding you back, and we’ll tell you whether it is worth fixing.
